

## How to skin a rabbit

1. Put the rabbit on a chopping board
2. Use a cleaver to cut off each leg at the joint
3. Make a cut through the fur and skin at the abdomen (stomach)
4. Pull the muscle away from the skin. It comes away easily.
5. Work your way round to the rabbit's back
6. Peel the skin over the back legs like taking off a sock
7. Ease out each of the front legs
8. Pull the skin up to the rabbit's neck
9. Chop off the tail, head and Enjoy
